

# AUSTRALASIAN COLLEGE OF NUTRITIONAL AND ENVIRONMENTAL MEDICINE

## VISION

The leader in Nutritional and Environmental Medicine.

## MISSION

Establish Nutritional and Environmental Medicine as central to medical practice.

*Australians and New Zealanders will no longer need to seek out a doctor proficient in nutritional science. Within 10 years:*

- *Every medical and dental student will receive a grounding in nutritional biochemistry and physiology as part of their undergraduate education.*
- *Every GP will have access to Nutritional and Environmental Medicine as part of their registrar training and continuing professional development.*
- *The College will provide an AMC accredited Fellowship in Nutritional and Environmental Medicine*

## CORE VALUES

We are passionate about Nutritional and Environmental Medicine, driven by the knowledge and experience of better patient outcomes and improved patient safety. We believe in treating the whole person and the underlying causes of illness and disease. We draw inspiration from the latest biomedical and genetic science balanced with the needs of each individual. We aspire to practice with the utmost integrity for the health of our patients and the benefit of the community at large.

## AIMS & OBJECTIVES

- Provide leadership and excellence in Nutritional and Environmental Medicine.
- Establish and develop Nutritional and Environmental Medicine as a core competency and pathway in medical education and training.
- Promote and advocate for Nutritional and Environmental Medicine to the profession, policy makers and the public.
- Foster, support, and develop our members in their practice of Nutritional and Environmental Medicine.
- In pursuing the above, improve the health and well-being of individuals, communities and society.
