2017 Education & Training Calendar

Primary Modules in NEM

**March 2017**

**Thyroid & Adrenal Conditions**

**18 & 19 March**

Foundation postgraduate training in Nutritional and Environmental Medicine

2 days face to face + equivalent of 2 days online + required activities

**July 2017**

**Environmental Health**

**29 & 30 July**

This practical workshop will explore industrial, food-based and other environmental pollutants and toxicants that affect our health and have far reaching effects for future generations. With the help of experts in the field, we will explore education to assist our patients in making informed choices, indications and clinical treatment options where available.

2 days face-to-face + required activities

**November 2017**

**Metabolic Conditions, Diabetes & Cardiovascular Disease**

**23 & 24 November**

This module will assist with the understanding of insulin resistance and underlying metabolic biochemistry. Practical, evidence-based solutions through diet, nutrition, gut health and case history discussion will enable immediate application in clinical practice.

2 days face-to-face + required activities

**A-Z of NEM**

**25 & 26 November**

This workshop will deepen your understanding of NEM, hone your case-taking skills, help you to identify relevant signs and symptoms of nutrient deficiencies, build on your treatment options and your confidence for improved patient outcomes.

2 days face to face + required activities

**ADELAIDE**

**2017**

**BRISBANE**

**2017**

**SYDNEY**

**2017**

ACNEM's mission is to establish Nutritional and Environmental Medicine as central to medical practice.

The Primary Modules in NEM 1 & 2 are delivered face-to-face over four days in November each year.

We also offer a hybrid two day face-to-face version; Primary Module 1 is presented at the venue and Primary Module 2 is completed online.

Concurrently, advanced modules are available face-to-face in their two day entirety.

ONLINE MODULES ALSO AVAILABLE - VISIT WWW.ACNEM.ORG FOR MORE INFORMATION
